PROFILE

Software engineer and MCA student who turns user and operational needs into practical software. I work across full-stack development, applied AI/ML, payment and assessment systems, and automation - from shaping the workflow to integrating a working system that people can use.

WHAT I BRING

- End-to-end delivery: connect frontends, APIs, payment and access flows, evaluation, administration, and reporting.
- Practical AI: integrate machine learning, computer vision, and LLM capabilities into understandable user workflows.
- Product-minded execution: clarify the problem, shape the user journey, build the system, and coordinate people around delivery.

EXPERIENCE

Technical Consultant | **Intellidea** — Apr 2025 - Present

- Built and migrated production websites for Intellidea and Intelliwise Academy during their move from Wix, and implemented SEO improvements.
- Implemented an assessment and payment workflow with Razorpay, access tokens, redeem codes, 48-hour access, administration, and automated reporting.
- Worked with Google Apps Script and Google Workspace for workflow automation, reporting, technical support, and maintenance.

Project Builder / Project Manager | **buildspace** — Jun 2024 - Jul 2024

- Worked across project building and coordination in a short, focused product environment.

Computer Science Subject Matter Expert | **Chegg** — Oct 2022 - Mar 2023
